

Astha Treatment Bills (ATB) - Corporate Project Profile

Complete English Translation

Project Name: Astha Treatment Bills (ATB)

Entrepreneur & Presenter: A.K.M. Mashiur Rahman (Founder & Chairman)

Slogan: "Treatment Won't Stop Due to Lack of Money"

Head Office: Lane: 08, House: 02, Road: 11, Sector: 06, Uttara, Dhaka-1270

Contact: Helpline & Customer Service (24/7 available)

1. Executive Summary

A large portion of Bangladesh's vast population belongs to the lower and middle-income groups. When suddenly faced with a serious illness or surgery, ordinary people have to break their savings or take loans at high interest. **Astha Treatment Bills (ATB)** is a modern, technology-based **health cash-back and subsidized card system**.

Our goal is to provide ordinary people with financial protection for 12 months in exchange for an annual membership fee of only **1,000 Taka**. If a member needs surgery, upon submitting the proper documents, they will receive **12,000 Taka** directly as cash assistance or cash-back.

2. Vision & Mission

Vision: By 2030, to bring 2 million subscribers under health protection coverage across Bangladesh through affordable medical treatment.

Mission:

- Get treatment finance spending just 3 Taka per day
- Ensure reliable and transparent claim processing

- Provide 24/7 uninterrupted call center service and support

Core Values: • Honesty • Transparency • Accountability • Humanity • Use of Technology • Fast Service • Member Satisfaction

Our Objectives: • Provide financial support for healthcare • Easy membership • Fast claim process • Digital healthcare platform • Build a long-term sustainable institution

3. Detailed SWOT Analysis

SWOT Analysis: Astha Treatment Bills (ATB)

STRENGTHS	WEAKNESSES
• 1,000 Taka for 12,000 Taka coverage	• Initial brand trust deficit
• Strong emotional branding	• Risk of fake/fraudulent claims
• Innovative and unique business model	• High initial operational costs
• 3 Taka/day savings appeal	• Limited hospital network initially

OPPORTUNITIES	THREATS
• Insufficient government healthcare support	• Legal and regulatory complications
• Corporate and government partnerships	• Inflation
• Digital platform and data monitoring	• Hospital over-billing
• Growing health awareness	• Organized fraud syndicates

Strengths (Detailed):

1. **1,000 Taka for 12,000 Taka Coverage (High Value Proposition):** Getting 12,000 Taka coverage for just 1,000 Taka is extremely attractive. For ordinary income groups, 1,000 Taka is not a large amount, but receiving 12,000 Taka during treatment is significant.

2. **Strong Emotional Slogan & Social Engagement:** The slogan "Treatment Won't Stop Due to Lack of Money" quickly resonates with people through social media and field-level campaigns.
 3. **Simple & Affordable Pricing Communication:** "Just 2.73 Taka (or 3 Taka)"—this pricing makes product positioning extremely easy for field executives.
 4. **Predictable Cash Flow:** The annual membership model brings in 1,000 Taka per member into the company account immediately, but claims are paid out over 365 days. This ensures the company always has sufficient working capital.
 5. **Scalability:** This is not a physical product but a service. Therefore, it can be scaled very quickly without production constraints.
 6. **Social Objective:** ATB's core objective is to serve the underprivileged. This social purpose helps build public trust easily.
 7. **Huge Potential Market:** A vast portion of Bangladesh's population is vulnerable to healthcare costs. Therefore, the growth potential is immense.
 8. **Affordable Membership Fee:** A 1,000 Taka annual membership fee is accessible to the general public.
 9. **Technology-Based Service:** Website, digital member registration, mobile app, and SMS notification systems enable fast and transparent service.
 10. **Social Impact:** This successful venture isn't just a business—it can create significant social impact and change.
 11. **Brand Building Opportunity:** If implemented properly, ATB can become a strong national brand.
 12. **Hospital Partnership Potential:** Collaborating with hospitals can create better opportunities for members.
 13. **Data Monetization Potential:** Collected data on members and claims can enable more sophisticated services in the future.
-

Weaknesses (Limitations/Internal Challenges):

1. **Initial Brand Trust Deficit:** Due to experiences with MLM or fraudulent companies in Bangladesh, ordinary people may hesitate initially to invest money.

2. **High Risk of Fake/Fraudulent Claims:** There is a significant risk of someone colluding with dishonest doctors to create fake surgery documents and claim 12,000 Taka.
 3. **High Initial Operating Expenses:** Maintaining a 24/7 call center, developing an IT platform, keeping medical staff, and branding requires a substantial initial budget.
 4. **Initial Hospital Network Limitations:** Building a nationwide hospital network from the start is difficult, which may affect customer service.
 5. **Initial Brand Trust** Initially, gaining public trust will be challenging.
 6. **High Claim Risk** If fraudulent claims occur, financial losses could result.
 7. **Capital Limitations** Without sufficient initial capital, technology and human resources may be limited.
 8. **Need for Skilled Personnel** Skilled professionals are needed in claim processing, graphic design, technology, and finance.
 9. **Competition Risk** Competitors may enter with similar services.
 10. **Hospital Network Building** Partnering with enough hospitals takes time and costs.
 11. **Cash Flow** Even with income, operational costs are monthly. Beyond membership fees...
-

Opportunities (Detailed):

1. **Vast & Untapped Market:** Of Bangladesh's 17 crore population, a huge portion has no health insurance or medical coverage. About 80% of the country's lower and middle-income people remain outside this service.
2. **Government & Corporate Partnerships (B2B):** The ready-made garment (RMG) sector owners can provide this card to thousands of factory workers through tie-ups. This can also be subsidized as CSR.
3. **Digital & MFS Integration:** Through bKash, Nagad, or Rocket, the 1,000 Taka card can be easily registered from home via auto-renewal systems.
4. **Health Data & Analytics:** With a large number of members' treatment data, future opportunities include partnering with diagnostic centers, pharmaceutical companies, and pathologists for additional revenue.

5. **Expanding Services in the Future:** In later phases, increasing card categories (e.g., diagnostic discounts, free doctor consultations, discounted cards for major surgeries) can multiply company revenue.
 6. **Digital Bangladesh Convenience:** Online enrollment and digital payments becoming easier will accelerate member acquisition.
 7. **Corporate Memberships:** Various institutions can purchase memberships for their employees.
 8. **Special Hospital Tie-ups:** Negotiating special arrangements with hospitals can ensure discounts or enhanced services for members.
 9. **New Services:** Telemedicine, health checkups, medicine discounts, etc., can be added in the future.
 10. **Mobile App Engagement:** Through a mobile app, regular engagement with members can be maintained.
 11. **CSR Partnerships:** Large companies can provide support as part of their corporate social responsibility.
 12. **International Collaboration:** International health organizations may offer technical assistance.
 13. **Collaboration with Health NGOs:** Partnerships with organizations working in the health sector can provide technical support opportunities.
-

Threats (Detailed):

1. **Legal & Regulatory Complications:** If the regulatory authority or Ministry of Health classifies this as unauthorized insurance or micro-insurance, it could face restrictions.
2. **Organized Fraud Syndicates:** A group of members may collude to submit false claims, causing significant financial loss.
3. **Hospital Over-Billing:** Unethical hospitals, knowing the patient will get 12,000 Taka from ATB, may inflate bills.
4. **Economic Recession & Inflation:** If inflation causes hospital treatment costs to rise abnormally, the 12,000 Taka coverage may seem insufficient to customers.

5. **Legal Complications:** This type of program may be considered insurance or insurance-like service in Bangladesh. Operating without required licenses could create legal complications.
 6. **Competition:** Insurance companies, healthcare institutions, or new startups may introduce similar services.
 7. **Reputation Damage Risk:** Claim delays or unsatisfactory service can spread rapidly through social media.
 8. **Fraud:** Financial loss may occur due to fake doctors or dishonest practitioners.
 9. **Economic Changes:** Currency devaluation or reduction in people's income may reduce membership renewal.
 10. **Cybersecurity:** If member data is leaked, the institution's trustworthiness could be damaged.
-

4. Summary of SWOT (Consolidated)

1. Strengths:

- **High Value Proposition:** 1,000 Taka for 12,000 Taka coverage quickly attracts customers.
- **Simple Pricing Strategy:** "Just 2.73 Taka" pricing makes product positioning very easy in the field.
- **Positive Cash Flow:** The annual membership model brings in full money immediately, ensuring company stability.

2. Weaknesses:

- **Initial Brand Trust Deficit:** Gaining public confidence takes time in the beginning.
- **Fake Claim Risk:** There is opportunity for dishonest individuals to submit false surgery documents.

3. Opportunities:

- **Untapped Market:** Approximately 90% of Bangladesh's 17 crore population has no health insurance coverage.
- **Government & Corporate (B2B) Tie-ups:** There are huge opportunities to provide memberships to workers in garment factories.
- **Data Monetization:** Future opportunities to affiliate with diagnostics and pharmaceutical companies.

4. Threats:

- **Legal Ambiguity:** There may be regulatory complications since this is not exactly insurance.
 - **Organized Fraud Syndicates:** Collusion between dishonest doctors and patients.
-

5. Claim Process & Workflow

Quick Overview Table

Step	Activity	Timeframe (TAT)	Responsible Team
1. Pre-Notification	After hospital admission or before surgery, contact center notification	12-24 hours before surgery	Customer Care (24/7)
2. Document Submission	After receiving discharge, upload required documents via app/website	Within 7 days	Field Agent
3. Initial Screening	Review documents, waiting period verification	24 hours	IT & Verification Team
4. Medical & Legal Verification	Hospital verification, OT notes, doctor signature verification	24-48 hours	In-house Medical Team
5. Disbursement (Payment)	Claim approval, transfer to member's bKash/account	12-24 hours	Finance & Accounts Team

Step-by-Step Sequence

Step 1: Hospital Admission & Initial Notification (Intimation): 24/7 Call Center Support.

- When a patient is admitted to the hospital or surgery is scheduled, the member informs ATB's 24/7 call center via phone or app "Claim Notice" option.

- The call center registers the member's ID number and waiting period (e.g., if the surgery is after 30 days) in the system and creates a Ticket Number.

Step 2: Document Collection & Submission: Within 7 days.

- After receiving the discharge certificate from the hospital, the field agent submits documents via app, website, or directly to the office:
 - Original hospital discharge summary
 - OT Note & prescription from the surgeon
 - Original paid bills (with paid seal)
 - Patient's national ID (NID) and ATB ID card

Step 3: Initial & Automated Screening: Time: 24 hours.

- The system and data team check if all member information is correct and documents are clear.
- If information is incomplete, the member is immediately contacted via SMS or call for additional information.

Step 4: Medical Verification & Audit: Time: 24-48 hours.

- The medical team (In-house Medical Team) verifies the hospital discharge summary and OT notes to confirm that the surgery was actually performed.
- **Random Spot Verification:** If suspicious, the verification team contacts the hospital's responsible person or surgeon directly to cross-check.

Step 5: Approval & Settlement: Time: 12-24 hours.

- After the medical team confirms, the Claim Head approves.
- The finance team automatically transfers 12,000 Taka to the member's bKash/account via the payment gateway.
- Upon successful payment, an SMS notification is sent to the member's phone.

Strategic Recommendations:

1. Anti-Fraud Strategy:

- **30-Day Waiting Period:** Claims within 30 days of membership are not eligible (except emergencies).
- **Designated Hospitals Only:** Only documents from ATB-accredited hospitals are accepted.
- **In-House Medical Team:** Our own medical team directly contacts the surgeon for spot verification of OT Notes and prescriptions.

2. Legal Strategy: This service should be branded as "Health Cash-Back Membership" or "Medical Bill Discount" rather than "Insurance."

3. Financial Strategy (The Math):

- Revenue from 100,000 members = 10 Crore Taka
 - Maximum 3% of members may need surgery = 3,000 people
 - Cost for 3,000 people × 12,000 Taka = 3.6 Crore Taka
 - **Margin/Profit:** 6.4 Crore Taka (which covers call center, marketing, staff salaries, and reserves)
-

6. Anti-Fraud Guardrails (5 Prevention Measures)

To keep the fund safe from fraud, these rules must be strictly enforced:

1. **Designated Hospitals Only:** Only documents from enlisted/accredited hospitals are eligible.
 2. **OT Note Mandatory:** Even if someone fabricates fake prescriptions, the surgeon's signed "Surgery OT Note" is difficult to forge.
 3. **Random Spot Verification:** When a claim is submitted, ATB field investigators conduct spot verification.
 4. **Pre-Existing Conditions Exclusion:** The first 30/60 days of membership are not eligible for pre-existing conditions (e.g., chronic illnesses).
 5. **Digital Tracking & Blacklist:** If any individual or institution is found committing fraud, they are placed on the system's blacklist.
-

7. Covered Surgeries

Under our membership, surgeries that are completed within 24 hours of hospital admission and are life-saving are eligible.

Surgeries that are generally life-saving, emergency-related, or recommended by doctors are included in this list.

Hospital admissions within 24 hours: ATB provides financial support for these surgeries (Inclusions):

- High fever
- Dengue

- Pneumonia
- Typhoid
- Severe diarrhea
- Cholera
- Meningitis
- Tonsillitis
- Kidney-related conditions
- Cancer patients
- Respiratory distress patients
- Asthma attack patients
- Stroke patients
- High blood pressure patients
- Gastric/Stomach issues
- Any accident
- ICU-admitted patients
- Emergency accident victims
- Burn victims
- Snakebite & poison
- Tumor removal from the brain
- Fissure & Fistula surgery
- Orthopedic & Trauma treatment (bone & spine treatment)

Emergency accident-related: ATB provides financial support for:

- Head injury
- Eye injury
- Cut wounds
- Road accidents
- Poisoning
- Injury from falling from height
- Respiratory distress
- Only emergency medical treatment

Note: There is a minimum period related to surgery support.

ATB members will receive financial support for surgeries at the institution's determined minimum period, conditions, and eligibility criteria.

The institution may provide financial support for additional surgeries based on financial capacity, number of members, reserve fund, hospital partnerships, and policy decisions. The list will be expanded in phases.

ATB's goal is to gradually include more surgeries under this program so that more people across the country can access financial support during treatment.

Important: Which surgeries are currently covered—the updated list will be published on ATB's official website, mobile app, and policies. The most recently published list is considered final.

Based on operational decisions, this list will be expanded in phases:

Serial	Surgery Name (Bengali)	Surgery Name (English)	Department
1	সিজারিয়ান সেকশন	Cesarean Section (C-Section)	Gynecology & Obstetrics
2	অ্যাপেন্ডিসাইটিস সার্জারি	Appendectomy	General Surgery
3	পিত্তথলির পাথর অপসারণ	Cholecystectomy (Gallbladder)	General Surgery
4	হার্নিয়া সার্জারি	Hernia Repair	General Surgery
5	জরায়ু অপসারণ	Hysterectomy	Gynecology & Obstetrics
6	জরায়ুর টিউমার অপসারণ	Myomectomy	Gynecology & Obstetrics
7	কিডনির পাথর অপসারণ	Kidney Stone Removal (Lithotripsy/PCNL)	Urology
8	প্রোস্টেট সার্জারি	Prostate Surgery (TURP)	Urology
9	পাইলস বা অর্শ সার্জারি	Hemorrhoidectomy / Piles Surgery	Colorectal Surgery
10	ফিসার ও ফিস্টুলা সার্জারি	Fissure / Fistula Surgery	Colorectal Surgery
11	চোখের ছানি অপারেশন	Cataract Surgery (Phaco)	Ophthalmology
12	টনসিল সার্জারি	Tonsillectomy	ENT

Serial	Surgery Name (Bengali)	Surgery Name (English)	Department
13	নাকের হাড় অক্লিপচার	Septoplasty / Rhinoplasty (Medical)	ENT
14	কানের পর্দা প্রতিষ্ঠাপন	Tympanoplasty	ENT
15	ভাঙা হাড়ের অপারেশন	Bone Fracture Fixation (Plating)	Orthopedics
16	হাঁটু প্রতিস্থাপন	Knee Replacement	Orthopedics
17	কোমর বা নিতম্ব প্রতিস্থাপন	Hip Replacement	Orthopedics
18	মস্তিষ্কের টিউমার সার্জারি	Brain Tumor Surgery (Craniotomy)	Neurosurgery
19	মেরুদণ্ডের হাড়ের সার্জারি	Laminectomy / Spinal Surgery	Neurosurgery
20	হৃদয়ের বাইপাস সার্জারি	Coronary Artery Bypass Graft (CABG)	Cardiovascular
21	হৃদয়ের রিং বসানো	Angioplasty / Stenting	Cardiovascular
22	পেসমেকার বসানো	Pacemaker Implantation	Cardiovascular
23	টিউমার/ক্যান্সার সার্জারি	Tumor / Cancer Resection	Oncology (Cancer)
24	পাকস্থলী বা অন্ত্রের সার্জারি	Gastrectomy / Intestinal Surgery	Gastroenterology
25	থাইরয়েড গ্রন্থি সার্জারি	Thyroid Surgery	General Surgery

Excluded Surgeries:

Serial	Category (Bengali)	Category (English)	Reason
1	সৌন্দর্য/প্রসাধনী সার্জারি	Cosmetic & Aesthetic Surgery	Performed for aesthetic purposes only
2	ওজন কমানোর সার্জারি	Bariatric / Weight Loss Surgery	Lifestyle-related surgery
3	বন্ধ্যাত্ব ও IVF	Infertility Treatment & IVF	Long-term treatment
4	দাঁতের প্রসাধনী কাজ	Cosmetic Dental Implants	Not standard medical surgery
5	লিঙ্গ পরিবর্তন সার্জারি	Sex Reassignment Surgery	Social & ethical considerations
6	আত্মঘাতী কারণে সার্জারি	Self-inflicted Injury Surgery	Self-inflicted & legal/policy reasons
7	মাদকজনিত কারণে সার্জারি	Surgery due to Substance Abuse	Caused by alcohol or drug abuse

Special Note:

- **Gynecology & Obstetrics:** C-Section, Hysterectomy, Myomectomy
- **General Surgery:** Appendectomy, Gallbladder stones, Hernia, Piles, Fistula
- **Orthopedics:** Fracture fixation, Knee & Hip replacement
- **Cardiology & Complex Surgeries:** Heart bypass, Stenting, Pacemaker, Kidney stones
- **ENT & Eye:** Cataract surgery (Phaco), Tonsillectomy, Nasal bone correction

(Note: Cosmetic surgery, weight loss surgery, or surgeries caused by alcohol/drugs remain outside the policy.)

8. Future Roadmap

1st Year (Pilot & Local Expansion): Distribute Membership IDs and build the system in Dhaka and surrounding districts.

2nd Year (National Expansion): Deploy dealers/agents in all districts and sub-districts, distribute 5 lakh Membership IDs.

3rd Year (Digital Transformation): Launch self-registration through government mobile banking (bKash/Nagad) apps and telemedicine services.

- Establish a strong national-level health support platform

Membership ID, Partnership, Healthcare-related value-added services

Expense Headings:

• Office rent • Employee salaries • Technology & software • Call center • Marketing • Legal & audit • Administrative expenses

Financial Planning

The first 12 months will be considered the foundational phase.

Goals: Member acquisition, brand establishment, hospital networking, technological development, reserve fund formation.

Possible Success Path

If the institution can consistently acquire members, control operational costs, maintain adequate reserves for claims, and follow policies—then this has the potential to become a sustainable and profitable business venture in the long term.

Actual profit depends on member count, claim rates, and operational efficiency.

Risk Management:

• Claim fraud • Hospital fraud • Data security • Financial reserves • Regular auditing • Prevention measures

Organizational Structure

Initial Management: • Chairman • Managing Director • Director – Finance & Administration • Operations Manager • Accounts Officer • Claim Officer • IT Officer • Customer Service Executive • Marketing Executive • Call Center Executive • Office Assistant

ATB Management Hierarchy:

Position
General Manager
Operations Manager
Finance Manager
Accounts Officer
Claim Manager
Medical Verification Officer
Customer Care Executive
Call Center Executive (Shift)
Digital Marketing Executive
Graphic Designer
Content Writer
Web Developer
Software Engineer
Mobile App Developer
HR Officer
Admin Officer
Field Marketing Executive
Area Manager

Position
Branch Manager
Internal Auditor
Legal Officer

Technology & Systems:

• IVR System (Interactive Voice Response) • Ticket Management • Claim Tracking • SMS Notification

Website Features:

• Home • About • Membership • Claim Process • Hospital Network • FAQ • Contact • Apply Membership • Online Payment • Claim Submission • Member Login

Required Software:

• CRM • ERP • HR Software • Accounting Software • Call Center Software • Claim Management Software • Document Management • Payment Gateway

Marketing Channels:

• Sub-district Representatives • District Representatives • Corporate Tie-ups • Hospital Networks • Doctor Partnerships • Union-level Representatives

Target Customers:

• Middle-income families • Government employees • Small entrepreneurs • Students • Garment workers

App Features:

- Hospital Search • Notification • Live Chat
-

Branding Materials:

- Logo • Visiting Card • ID Card • Uniform • Letterhead • Envelope • File Folder • Membership Card • Roll-up Banner • Billboard
-

Technology:

- Website • Android App • iOS App • AI Chatbot • CRM • ERP • Online Payment • SMS Gateway • Email System
-

Marketing Platforms:

- Facebook • YouTube • Google • LinkedIn • TikTok • Corporate Networks • Hospital Networks • District-level Engagement
-

Conclusion:

The core strength of ATB – Astha Treatment Bills lies in its goal of standing by people in their time of need. This is a long-term and sustainable social business venture. This is not just a business; it serves as a dependable shelter for ordinary people. To be successful, the institution must maintain transparency, strong financial planning, robust risk management, legal compliance, and advanced technology to retain member trust. Through phased expansion, risk management, and policy-compliant financial planning, ATB can establish itself as a sustainable and respectable institution.

Through organized and systematic management, fair and ethical practices, and a combination of renewal strategies—this can create stable and predictable recurring revenue for investors.
